OK	2	0	0	0	
TX	2	4	0	0	
Total	4	5	0	0	= 9

Significant Events

No significant events for this reporting period

Field Operations

Hood Junior High School Mercury Spill, Odessa, Ector County, Texas:

OSC McAteer and START Contractor remain on-scene providing oversight and support to Ector County ISD Contractors in the cleanup of the Hood Junior High School.
 The actions completed on Thursday (3/27/14) include:

- Tile in cafeteria has been completely removed followed by vacuuming floors with Merc-Vac. A coating will be applied overnight (3/27/14) to the bare floor in an attempt to seal any residual mercury in place;
- Activity based sampling has been completed in almost all classrooms. Activity based sampling will continue in the rooms associated with the athletics and science section of the school;

- The test application of the polymer-based product via a thick trowell application was successful and significantly reduced the mercury levels on the floor. A final test with this product as a thin spray-on application will be conducted on 3/28/14.
- The test application of the sulfur-based product was less successful but still reduced the mercury levels on the floor;
- Furniture and items associated with contaminated classrooms will continue to be poly wrapped and placed in the fenced-in tennis courts for later evaluation;
- Band instruments were cleared and returned to school officials for use at alternate location;
- The school remains closed until cleanup is completed.

Exercises

No exercises for this reporting period
